*Experience is a teacher...*

If we don't plan for  
emergencies.....

.....we can't deal with  
them effectively.

-

# Your Pre-Plan Team

- Municipal Police/Fire/EMS/Public Safety staff
- Site supervisory team
- Site management
- Site security team
- Insurance Loss Control Specialist
- Vendors

***Evaluate loss potentials and prepare to manage the impact of those potentials.***

# *3 Steps to Effective Planning*

1. Before the event
2. During the event
3. After the event

## 1. Before the event:

- Invite the local emergency responders to the facilities, to learn about the site, challenges, and needs.
- Involve the local emergency responders in development of your emergency plan as they develop their plans.
- Keep in touch periodically, so that changes are updated, etc.
- Have a risk management plan developed and use your insurance broker to develop a business continuity plan.

**Be proactive**

# *3 Steps to Effective Planning*

1. Before the event
2. During the event
3. After the event

## 2. During the the event:

- Facility operators have a different set of priorities than emergency responders coming to help you.

Continuation of Business Operations  
Protection of Business Records  
Plant emergency operations  
versus  
Manage the emergency

# *3 Steps to Effective Planning*

1. Before the event
2. During the event
3. After the event

## 3. After the the event:

- Use the resource management plan to contact your vendors to get your facility back in order.
- Use your insurance broker as much as possible to get you back up and running.
